Native

EXPERIENCE

Software Developer
Company: **Pondit**
(August, 2023 - Continuing)

Intern
Company: **Pondit**
(April, 2023 - July,2023)

PROJECTS

Time Travel

Time Travel is an e-commerce platform built with Laravel that allows users to buy watches based on their desired categories. The platform features a rule permission system with different roles and permissions for admin, editors, and regular users, ensuring a secure and organized system. The platform utilizes Bootstrap, MySQL, and Laravel Breeze for front-end design, data storage, and user authentication respectively, providing users with a seamless and secure shopping experience.

Ecommerce-Gadget

I'm currently working on a Laravel-based gadget ecommerce project that's almost 50% complete. It will offer customers a wide range of gadgets to choose from, and features a user-friendly interface, robust back-end system, and advanced security measures.

Portfolio

I have developed a portfolio website using Laravel, which showcases my professional experience, skills, and achievements. The website features a clean, modern design that is both visually appealing and easy to navigate.
